

## ABTech AT200 air bearing spin table featuring Renishaw's REXM and DSi (Dual SiGNUM™ interface)

# 0.045 arc second resolution ±0.23 arc second encoder accuracy\*

<b>Encoder:</b>	2 Renishaw SiGNUM™ encoders, with DSi, reading from ultra-high accuracy 183 mm REXM ring. Test results show encoder achieving ±0.23 arc second total installed accuracy.	
<b>Table mechanical accuracy:</b>	Radial / axial:	0.050 µm
	Angular (coning):	0.025 µm / 25 mm
<b>Table options:</b>	Direct-drive brushless DC motor Vacuum feedthru Clean room compatible	

\*accuracy of encoder used on this exhibited table
