

# AT250/250-CA100-A5 Air bearing spin table

## 4" CLEAR APERTURE

**Shown with tilt and center worktable, electronic indicator and high resolution amplifier**

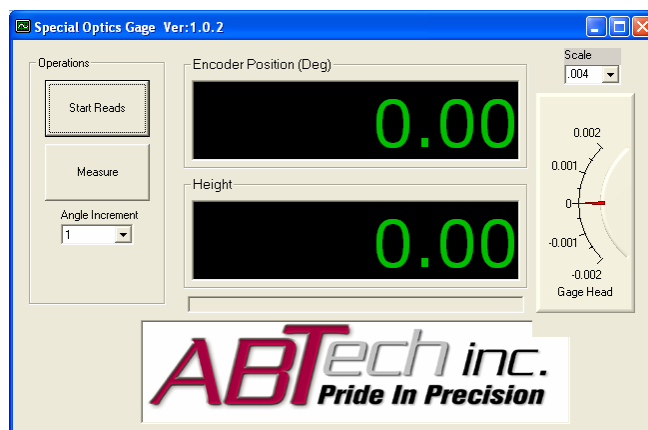

ABTech, Inc. offers our AT250 series high precision rotary air bearing with a 4" clear aperture ideal for applications requiring an ultra precision reference axis such as out of roundness, concentricity, squareness, and parallelism measurements. The large through hole is ideal for lens alignment applications requiring a clear aperture.

### Features and highlights

- Load capacity: 250 lbs
- Radial and axial accuracy 5 $\mu$ "
- Constructed of 440C stainless steel
- Low air consumption (1.5 scfm)
- High stiffness
- Made in USA

### Available accessories and options

- Accuracies to 1 $\mu$ "
- Motor drives
- Data capture software
- Tilt and center tables
- Granite surface plate and support stand
- Gage stands
- Electronic indicator and amplifier

**Application software available for recording and analyzing data**
